AUTHORISATION OF BULK DATASET

1. Definition

This Authorisation Form records the justification for SIS' handling and usage of specific bulk datasets. In legal terms, bulk data acquisitions are defined as:

Datasets acquired under Section 2 (2)(a) of the Security Service Act 1989 or Sections 2(2)(a) or 4(2)(a) of the Intelligence Services Act 1994 which contain data about a wide range of individuals including (adverse) data about individuals who are not of direct intelligence interest.

Authorisations are required where a bulk dataset:

- is likely to include large amounts of superfluous or non-targeted data;
- includes data about individuals of no intelligence interest that may be of a personal or sensitive nature;
- has been generated by any external organisation or partner agency and exhibits the above characteristics;
- will be exploited through the use of intrusive data mining techniques, however it is acquired.

2. Acquisition Case to be completed by the Acquiring Officer

Necessity

Please explain why it is necessary for SIS to hold and, where relevant, exploit this data covering the following points:

- Which NSC strategic intelligence priorities does this acquisition meet?
- What results or benefit do you expect it to provide?

Risk Assessment

Please comment on the following:

- What are the risks of holding this dataset that might have the potential to cause political embarrassment?
- What is the reputational damage to HMG or to SIS' operational equities should SIS possession of this dataset become known?

<u>4. Exploitation Case</u> (to be completed by the Exploitation Officer)

Intrusion of Exploitation

What is the assessment of the level of actual and collateral intrusion?

- Actual: the intrusion of (or interference with) privacy caused by accessing personal data as a result of analysis;
- Collateral: the intrusion or interference with privacy caused by holding the dataset in our analytical systems, prior to any action taken by an analyst.
